

*Włodzimierz Trzebiatowski  
Institute  
of Low Temperature and  
Structure Research of the  
Polish Academy of Sciences*

*60*

*2026*

*Dear Professor, Corresponding member of the PAS,  
Doctor Hab. KACZOROWSKI!*

*Dear colleagues and friends!*

*Researchers of the B. Verkin Institute for Low Temperature Physics and Engineering of the National Academy of Sciences of Ukraine, with a feeling of heartfelt warmth and sincere respect, congratulate you personally and the team of the Włodzimierz Trzebiatowski Institute of Low Temperature and Structure Research of the Polish Academy of Sciences on the glorious 60th anniversary of your Institute!*

*Since its early days, the Institute of Low Temperature and Structure Research of the Polish Academy of Sciences has been an outstanding scientific institution that organically combines in its activities deep fundamental science with broad applied applications of its results. Created through the efforts of Professor Włodzimierz Trzebiatowski, INTiBS PAN relied on the powerful academic research schools of the Low Temperature Division of the Institute of Physics of the Polish Academy of Sciences and the Division of physico-chemical structural research of the Polish Academy of Sciences and covered an important spectrum of areas in the field of low-temperature physics: from physico-chemical to structural and magnetic studies of matter.*

*INTiBS PAN has been successfully developing relevant new scientific directions and modern scientific schools, not only successfully enriching the world's treasury of knowledge, but also creating the foundations of new technologies of the present and the future. The achievements of its scientists are well known throughout the world, international collaboration spans many countries, and modern science policy is recognized by the European Community.*

*We know well and highly appreciate your achievements, both as colleagues and good neighbors, and as your sincere friends, united by many years of cooperation and fruitful interaction, deep respect and scientific personnel. Thus, we are especially pleased to congratulate you on your anniversary these days, as our two institutes have been united by mutual scientific cooperation and interaction for many years.*

*The collaboration was initiated by the founders of our institutes, Włodzimierz Trzebiatowski and Borys Verkin, back in the late 1960s. Joint low-temperature research, the youth of both institutes, which are almost the same age, and an unquenchable thirst for new knowledge united our teams then and have stood the test of time for years. Since then, the young institutes have formally become not so young anymore, and now bear the names of their founders, but youth and determination live in their hearts.*

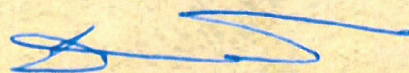

*On behalf of our institute, I would especially like to thank The Włodzimierz Trzebiatowski Institute of Low Temperature and Structure Research PAS, first of all, its leader and scientists, for the enormous support that your institute provided and continues to provide to ILTPE after the start of the large-scale russian invasion, and to note the great role that INTiBS PAN played in saving the lives of scientists of ILTPE and their families, creating the opportunity for them and our institute to continue their scientific activities.*

*We are infinitely grateful to our Polish colleagues, organizations, and Poland for their support and shelter. We hope that peaceful times will come for our country and we will be able to fully thank our friends and colleagues. We hope that strong friendship and scientific cooperation will continue to unite our teams in the future.*

*Today, we wholeheartedly congratulate all your employees on the 60th anniversary of INTiBS PAN and wish you new creative successes on the path to understanding the secrets of nature, inspiration, good health, good luck and prosperity. Peace and clear skies! Niech żyje Polska!*

*On behalf of the researchers of the B.I. Verkin Institute for Low Temperature Physics and Engineering of the NAS of Ukraine*

*Acting Director  
of the B. Verkin ILTPE of NASU  
Professor, Corresponding member  
of the NASU*

**Oleksandr DOLBYN**
